

# datascope

- Induct new operatives onto the system
- Review and monitor an individual's movements
- Restrict access to certain parts of a site
- Book and manage site training and inductions
- View and print a range of customisable reports, including muster reports

## Time & Attendance Management

Monitoring your workforce's time and attendance, labour tracking and data collection can be both time consuming and tedious. DataScope's Time & Attendance Management Solutions are a simple yet effective way to control labour costs, minimise compliance risk and improve workforce productivity.

### Overview: Time and Attendance System

Typically our Time and Attendance solutions use a combination of full-height turnstiles paired with either proximity cards or fingerprint recognition systems to enable operatives to securely enter and exit sites with all of their captured data being sent instantly to our intuitive online interface. With a secure login to our **Time and Attendance** system, users can access a range of essential tools and reports in aiding workforce management:

### A Solution for Every Project

We understand that there's no one-size-fits-all solution to managing Time & Attendance on construction sites so our in-house team of developers has designed a range of bespoke products to meet the requirements of projects of all sizes. Regardless of your project's size or location, DataScope has you covered.

## Time & Attendance Management

### DataPod

The ideal solution for clients who require flexibility and may need to change entry/exit points of their site during a project. DataPod is a self-contained cabin that can be deployed in under two hours and can be easily moved at any time.

- Full-Height Turnstile
- Biometric or proximity card reader
- Lockable anti-vandal shutter door
- Tool hatch
- Can be liveried to company colours
- Integrated with the DataScope online Time & Attendance system

### DataTime

Designed specifically for remote construction sites or sites which do not have the space or need for a turnstile, DataTime has all the benefits of our Time & Attendance Management system all contained in one highly mobile unit that can sit anywhere on site and be moved at any time.

- Instant setup, can be simply unplugged and moved if required
- Secure and reliable biometric/swipe card technology
- Touchscreen allows for enrolment on the unit itself
- Option for health and safety/ fatigue management questions
- Integrated with the DataScope online Time & Attendance system

### Remote Worker App

The Remote Worker Application is an intelligent solution for monitoring movements of workers attending remote sites in various locations anywhere in the country. Operatives can use the Remote Worker app to clock in and out of work sites they are assigned to from any smartphone. This data is then instantly sent to our interface for review.

- Uses GPRS to record an operative's location
- Compatible with any smartphone
- Accurately records the time an operative clocks in and out of a site
- Option to add a set of questions – for example fatigue management
- Integrated with the DataScope Time & Attendance System
- Multiple users can log in from one smartphone
